M LAW

NOVEMBER 12, 2026 / 1:00 PM ET

One firm.
A connected beginning.

A working demonstration for reception, matters and team coordination. Today: agree the first pilot, its owner and the evidence for a safe transition.

THE 12-MINUTE WALKTHROUGH

01 **Meet Maya**

Choose a language, play her greeting, create a fictional inquiry and reserve a consultation. Local voice mode supports interruption.

02 **Follow the matter**

Open the linked intake, owner, tasks and calendar. Show the daily brief and the work that needs attention.

03 **Prepare and review**

Create a work product and request an internal attorney review tied to that document version.

04 **Plan the transition**

Try the sample import. Record current subscriptions, export owners and the first workflow to pilot.

DECISIONS TO RECORD WITH ADNAN

- ☐ Pilot workflow and responsible attorney
- ☐ Staff roles, current systems and export owners
- ☐ Hosting, maintenance and human escalation owner
- ☐ Language acceptance and parallel-run review date

OPEN THE MEETING

This computer: double-click Start Meeting.cmd in the project folder. Keep its window open. **Online:** use the private preview on the owner's signed-in device. The online preview stores fictional records in that browser.

Demonstration and pilot planning. Live phone forwarding is a later step. Production security, legal rules, filing, trust accounting and real-call operation still need implementation or validation. Firm-owned software reduces subscription dependence; hosting, phone usage and maintenance remain operating costs.
